

KEY HIGHLIGHTS

Pre-authorisations worth more than Rs. 2,050 crore raised

More than 15.5 lakh hospitalisation cases under the scheme

National Health Authority office inaugurated

More than 2.5 crore e-cards prepared

Railway hospitals joined PM-JAY hospital network

FROM CEO'S DESK

**Dr. Indu Bhushan
CEO, National Health
Authority (NHA)**

Dear Readers,

It is gratifying, indeed heart-warming, to witness and learn about the widespread acceptance of Ayushman Bharat Pradhan Mantri Jan Arogya Yojana (AB PM-JAY) from people from various parts of the country. It has been a busy month for Ayushman Bharat PM-JAY as a lot is happening at a feverish pace.

To begin with, we crossed a significant milestone with 15 lakh patients availing cashless secondary and tertiary treatment worth more than INR 2,000 crore in less than 170 days. Because of PM-JAY, lakhs of poor patients and their families were able to save INR 5,000 crore they would have spent if they had taken the treatments on their own. Of course, many of them wouldn't have been able to avail of the treatment at all without the scheme. I would like to congratulate and thank all states and stakeholders for their efforts in ensuring a great start to PM-JAY and the impact it has begun to bring in the lives of millions of people within less than six months.

Meeting the needs of crores of beneficiaries will require maintaining a large supply of quality healthcare providers, both public and private. In this direction, we recently signed MoUs with the Indian Railways and Coal India Limited to bring their healthcare facilities into the PM-JAY network. Ninety-three railway hospitals and 24 Coal India hospitals across the country are in the process of getting empanelled and are preparing to start providing benefits under the scheme. We need to make concerted efforts to bring more private sector hospitals into the scheme's fold, especially the large hospital chains.

As part of our efforts to reach the last mile beneficiary, we have partnered with global ride hailing company, Uber, to extend benefits of quality healthcare to thousands of driver and courier partners in the country. We will seek to shortly forge similar partnerships with other e-commerce platforms to expand our coverage and reach. As the scheme completes six months, our focus will now be on how to reign in fraud and abuse of the scheme. This is critical not just because public money should go to the poor, the intended beneficiaries of the scheme, but also because it is important to protect the reputation and goodwill of the scheme.

Hon'ble Prime Minister, Shri Narendra Modi, traveled to Ahmedabad (Gujarat), Dhar (Madhya Pradesh), Kanyakumari (Tamil Nadu) and Gulbarga (Karnataka) recently to meet our beneficiaries and listen to their experiences. He was deeply moved and touched by their experiences. I thank our State teams for organising these interactions. Hon'ble PM asked me to share with you all that the teams involved in implementing Ayushman Bharat are getting blessings of lakhs of people across the country.

Hon'ble Prime Minister also recently launched a book Ayushman Bhava: 100 stories of Joy, Hope and Triumph. It is a collection of testimonies and stories of beneficiaries, front-line healthcare functionaries, and other stakeholders, collected and collated through extensive traveling and fieldwork across the length and breadth of the country. The book is available for download from the PM-JAY website.

Here's wishing all readers the best of health and well-being, always.

Jai Hind, Jai Bharat.

PM-JAY Status Update

Beneficiary Identification || Weekly progress (last 12 weeks)|| > 40% increase in the month of February

KEY HIGHLIGHTS

- Weekly beneficiary identification has increased more than 40% in the month of February
- Over 92% of beneficiary verification has been done using Aadhaar
- Over 14,000 hospital admissions per day on average in the month of Feb
- 67% of total 1366k admissions happened in private hospitals
Close to 15k hospitals empanelled (49% Private)

STATE IN FOCUS: HIMACHAL PRADESH

Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana (AB PM-JAY) was launched in Himachal Pradesh on 23rd September, 2018. Since the inception of the scheme, the State has continued to achieve milestones in areas like beneficiary identification, conducting awareness activities amongst masses and is making continued efforts to empanel more hospitals under the scheme for providing cashless and quality services to the eligible beneficiaries. In addition to the Government Hospitals, an increasing number of private hospitals are applying for empanelment under AB PM-JAY.

At present, 199 hospitals are empanelled under the scheme including 153 public and 46 private hospitals. In Himachal Pradesh, 22 Lakh beneficiaries are eligible to get enrolled under the scheme. Till date, 3,11,020 beneficiaries have been identified and PM-JAY e-cards have been issued to them, out of which 91 % are Aadhar linked. Around 5,816 beneficiaries have received the treatment under AB PM-JAY since its inception amounting to Rs 6.69 Crore. Hospitals have submitted 3,426 claims amounting to Rs 3.82 Crore out of which 2.06 Crore (1804 claims) have already been paid to the hospitals for providing treatment under the scheme. 201 beneficiaries of the State have taken treatment outside the State amounting to Rs 63.22 Lakh.

Various IEC activities are being carried out in the State to increase the awareness of beneficiaries about the Scheme. Nukkad natak in collaboration with Public Relations Department were carried out in all the blocks of the State in which people were informed about the scheme through dance, music and drama. Also, people are being informed and e-cards are being prepared in every Jan Manch programme. Recently, Dr. Rajendra Prasad Government Medical College and Hospital, Tanda received SKOCH Order of merit award for successful completion of 100 days of implementation of Ayushman Bharat.

Graph showing increasing number of patients admitted in hospitals under AB-PMJAY

RAY OF HOPE

Kamla Devi belongs to Kullu District of Himachal Pradesh. Few months back, she suffered from extreme pain in the chest and was referred to Civil Hospital, Kullu, where diagnostic tests were conducted. After the tests, she was referred to Indira Gandhi Medical College and Hospital (IGMC), Shimla. The doctors advised Angioplasty and Stenting in her heart. Since it was a costly procedure, and she belongs to a very poor family, the family was unable to afford treatment. Thankfully, Kamla and her family were covered under Ayushman Bharat - Pradhan Mantri Jan Arogya Yojana and got free of cost treatment for which she and family are very thankful to the Government of India. Kamla Devi was also the 10th Lakh beneficiary to avail treatment under AB PM-JAY in India.

Launch Function of Ayushman Bharat in Himachal Pradesh

NHA wins The Open Group President award for “Digital Health” & “Security by Design”

National Health Authority (NHA) has recently won The Open Group Award in President’s Award Category for “Digital Health” & “Security By Design”. The ceremony was held at the Grand Hyatt (Kochi) on 14th February 2019 and was attended by influential dignitaries and personalities. Shri J Satyanarayan (Retd. IAS), Chairman of Unique Identification Authority of India (UIDAI), the nodal agency of Government of India for implementing Aadhaar, was the Chief Guest. He has also served as the Electronics and Information Technology Secretary of India. Shri J Satyanarayan, Chairman of UIDAI, presented the award to National Health Authority (NHA).

This award is an encouraging recognition of the Company’s belief in Doing Well by Doing Good. The success story of Ayushman Bharat PM-JAY was presented at the event and was highly appreciated by all the participants as a case of architecture led digital service delivery by government. The Open Group is a global consortium that enables the achievement of business objectives through technology standards. It comprises more than 600 memberships from organizations all over the world, which range from major corporations, small to medium size businesses, government organizations and consortia, and universities.

PM-JAY IN NEWS

This blog was published in Republic on March 07, 2019 by Deepti Sachdeva.

Why I believe the Ayushman Bharat healthcare scheme has its heart in the right place

Mother Teresa once said poverty is not only being hungry and homeless, but being unwanted, untreated and uncared is the biggest form of poverty. Successive governments in India over the past few decades have miserably failed to usher in healthcare reforms that could benefit the poorest of the poor. Healthcare has never been a tool to garner votes and hence, has been blatantly ignored by governments in the past, with limited budgetary support to the ailing healthcare sector.

However, the Ayushman Bharat- National Health Protection Scheme (AB-NHPS) launched by the Narendra Modi government last year is among the most progressive and far-sighted schemes that could go a long way in providing healthcare benefits to the downtrodden. Since its inception, more than 13 lakh deprived people have received treatment through the government's praise-worthy Ayushman Bharat scheme and the number is just growing by leaps and bounds. No government in the past had ever envisioned such an inclusive, pro-poor and reformist health policy that promises to be a game changer for India's ailing health care sector.

For a nation that drastically lacks public sector healthcare infrastructure and where the rising out of the pocket private sector health care costs have made the sector highly unaffordable, the Ayushman Bharat scheme comes as a boon for millions of underprivileged ones. The path-breaking health care scheme envisages to provide a floater healthcare cover of 5 lakh per family, based on a pragmatic entitlement formula that has been devised by the government on a transparent mechanism.

The scheme is targeted at poor, deprived rural families and an It is based on the SocioEconomic Caste Census (SECC) 2011 data that includes about 8.03 crore families in rural and 2.33 crore in urban areas that are likely to be entitled for the healthcare scheme. In total, more than 10 crore families are likely to benefit from Ayushman Bharat, also named as Prime Minister's Jan Arogya Yojana (PMJAY). By one reckoning, around 50 crore people are expected to be covered by this landmark scheme that promises to usher in landmark reforms in the country's healthcare sector.

Even as India is increasingly becoming home to medical tourism and some world-class private sector healthcare facilities, albeit in select cities, the poor had scarcely benefitted from this development. Each year millions are deprived of treatment due to lack of finances or secondary and tertiary healthcare across the length and breadth of the country. However, Ayushman Bharat has created an unimaginable amalgamation of public as well as private sector healthcare that could go a long way in

transforming the healthcare sector. Scores of private sector hospitals are being empanelled in this ambitious health care scheme and the benefits are trickling down to the bottom of the value chain. I've always held the view that previous health care schemes have either proved to be a farce or had never been able to address the ever-concerning healthcare issues in the country. But Ayushman Bharat has its heart in the right place and promises to address the key issues surrounding the healthcare sector.

Several studies and government data indicate that more than two-thirds of the country's population is not covered through any health protection scheme and ends up paying their own medical expenses. Also, millions of Indians are pushed into poverty each year for paying sky-rocketing healthcare bills and tacking hospital emergencies.

However, a well concerted effort between the central and state governments could go a long way in the effective implementation of Ayushman Bharat that could pull out millions from the ambit of poverty that has been imposed due to spiraling health care bills.

It could also wean away a significant debt burden from the economically under-privileged that been reeling under increased health costs and uncertainty. On a longer term, it could even usher in growth and entrepreneurship as it could give more fiscal stability to millions of deprived families across the country.

Over decades, health care has never been a core electoral issue. It isn't something that could end up being a magnetic force for attracting voters or appeasing a wider category of rural people. However, the Ayushman Bharat scheme brings in a lot of positivity for the health care sector, despite a lot of clamouring by many that it's intended to attract voters and that its implementation is heck of a challenge.

We presently spend slightly just over 1% of our GDP on the health care sector, a figure that is abysmally low and equally alarming. But with Ayushman Bharat, the nation's spending on the core health care sector is also expected to go up sharply with a wider implementation of the health protection scheme over the years.

Prime Minister Narendra Modi has undeniably shown a strong intent to boost the nation's ailing health care sector and provide affordable healthcare for millions of people. However, it would be incumbent on the future governments to pick up the threads from here and ensure a smooth implementation for this landmark health scheme over posterity.

Union Health Minister, inaugurates National Health Authority & launches Ayushman Bharat Mobile App

Hon'ble Union Minister for Health & Family Welfare, Shri J. P. Nadda inaugurated the newly constituted National Health Authority (NHA) on 5th February. He also inaugurated the office of Ayushman Bharat Pradhan Mantri Jan Arogya (AB PM-JAY). The Minister formally opened the 7th and 9th floors of the Jeevan Bharati (LIC) Building, in the heart of the capital in Connaught Place, where the NHA, responsible for implementation of PM-JAY is currently housed in.

The National Health Agency had been restructured as National Health Authority (NHA) through a January cabinet decision. As per the notification dated 1st February, 2019, the Union Cabinet approved the restructuring of existing National Health Agency as “National Health Authority” for better implementation of the Pradhan Mantri Jan Arogya Yojana (PM-JAY). Through the decision, the National Health Agency, registered as a Society under Societies Registration Act 1860, has been dissolved and has been replaced by National Health Authority as an attached office to Ministry of Health & Family Welfare. With the dismantling of the earlier two-tiered management structure, NHA will have full functional autonomy and shall be governed by a Governing Board comprising of the Union Minister for Health & Family Welfare as its Chairman and 11 members. To effectively carry out the tasks allotted to it, the newly-created NHA through the Governing Board will be responsible for framing, amending and repealing of policies and administrative and financial procedures relating to hiring/utilization/retention of resources, outsourcing of various tasks, budgetary support, and release of funds including guidelines for bank accounts for the management and administration of the authority.

Dr. Vinod K. Paul, Member NITI Aayog, Shri Amitabh Kant, CEO NITI Aayog, Ms. Preeti Sudan, Secretary, Ministry of Health and Family Welfare, Dr. Indu Bhushan, CEO Ayushman Bharat PM-JAY and National Health Authority, Dr. Dinesh Arora, Deputy CEO, National Health Authority, were also present at the inauguration. Hon'ble Minister for Health and Family Welfare, Shri J P Nadda said that, “As Chairman of its Governing Board, I am very pleased to formally inaugurate the National Health Authority and mark this occasion by inaugurating this new office space in one of New Delhi's most iconic buildings, Jeevan Bharati, in the heart of the city. I wish Dr. Indu Bhushan and his team at NHA at the very best for the new innings and PM-JAY scheme great success in the time to come.”

The Hon'ble Minister also launched the Ayushman Bharat (PM-JAY) mobile app through a live demo. Introduced within just 4 months since the launch of the scheme, the app helps users get easy access to information on the scheme, check eligibility, find hospitals nearby and get assisted help. The mobile app has already reached more than 1.77 lakh installations and an average rating of 4.3, and has generated wide interest among the general public. The app is available on Google Play Store for Android users. Giving the app demo, Shri Nadda said that the mobile app is a great way to connect with our stakeholders and a handy way for them to get all important information on the Ayushman Bharat PM-JAY.

First regional capacity building workshop on claims adjudication

As PM-JAY progresses, we need to ensure timely and quality adjudication of the claims as per the guidelines laid down across the country. To ensure this, NHA has planned a series of training programs, in collaboration with the Insurance Institute of India, for senior doctors settling claims and for SHA medical teams. The first Capacity Building Workshop on “Claims Adjudication” was organized on 21st & 22nd February 2019 in Lucknow. 70 participants from the States of Uttar Pradesh, Bihar, Himachal Pradesh, Uttarakhand, Jammu & Kashmir, Haryana, Chandigarh and NHA attended the workshop. The training program had sessions on Medical Audit & Investigation of claims.

The key objectives of the training program held at trainer level were:

- To have a trained pool of medical approvers who shall follow the standard guidelines on claim adjudication and train the processing teams further below
- To build capacities of processing team for accurate settlement of claims under PM-JAY

Claims Adjudication Manual developed by NHA was released at the workshop for use and reference by processing teams. The workshop started with a presentation on basic concepts of claims adjudication by the faculty of the Insurance Institute. The presentations/discussions were held on ‘ideal/targeted’ turnaround time (TAT) for each step in the claim adjudication process along with process flows, roles and responsibilities of PPD (Preauthorization Panel Doctor), CEX (Claim Executive) & CPD (Claim Panel Doctor), State Health Agency and/or Insurance Company. IT team gave presentation on Approvers Manual and recent enhancements in Transaction Management System (TMS).

The key points discussed related to the workflow of transactions in PM-JAY through the TMS, roles and responsibilities of claim verifiers, software functionalities that support claim adjudication and various integrated reports in the portal. The upcoming features like insurance-trust hybrid mode, multiple pre-authorizations, partial claim settlement, multiple package selection, single sign-on and cancer treatment protocol were also explained. Case studies on Complicated Cases / Unspecified cases were discussed at length. Demo of Kaizala App, being developed for field investigation and medical audit, was organised, linking it to claim adjudication and field investigation. Discussions on Medical Audit and package specific mandatory documentation for adjudication were held.

It was highlighted that PM-JAY has established explicit criteria to ensure that there is enough documentary evidence available for each claim submitted. The checklist for medical audit of different packages was presented. An open house discussion on issues faced by SHA was also conducted. The workshop saw active participation and concluded with post-training assessment test of participants and the participants were awarded certificate issued jointly by NHA & Insurance Institute of India.

IEC team striving to reach out to all beneficiaries

Informing the beneficiaries and communicating the features of PM-JAY to them is key to successful implementation of the scheme. The IEC campaign launched by NHA across the country focuses on beneficiaries as the primary audience. The main objective of this far-reaching 360 degree IEC campaign is to reach out to the rural as well as the urban beneficiary population. The principal objective is to assist them in getting access to the scheme's benefits by ensuring that maximum beneficiaries get PM-JAY e-cards and to address the challenges faced by them. The IEC team at NHA has been using various modes of communications such as branding at outdoor sites and public utilities, vinyl wrapping on trains, SMS push through all mobile network operators, print advertisements, updating the country about progress of PM-JAY through newspaper advertisements and beneficiary stories in English, Hindi and regional languages, using mass media such as TV news and through leading FM channels across India, along with creation and dissemination of informative material such as leaflets, booklets, flyers, brochures, Radio Spots etc.

Due to the large number of people covered under PM-JAY, there is a strong need to spread awareness with the right message, right medium and within the right time frame. IEC activities were initiated immediately after the cabinet nod to the scheme on 21st March, 2018. The first major initiative “Additional Data Collection Drive (ADCD)” was conducted by participating in “Gram Swaraj Abhiyaan” of Ministry of Rural Development on 30th April, 2018 and celebrating “Ayushman Bharat Diwas” with the objective to make people aware about the upcoming scheme benefits and organising an entitlement check by involving ASHA & ANMs and Gram Sevaks covering around 3 lakh villages across the country.

Following the inception of the scheme and NHA, the logos for National Health Authority (erstwhile National Health Agency) and Ayushman Bharat PM-JAY (interpreting beneficiary sitting in Yoga mudra crafting a vision of healthy India) were designed. A comprehensive communication strategy was developed for pre-launch, launch and post-launch phases. Social media handles AyushmanNHA (Twitter), AyushmanBharatGol (Facebook), YouTube page have been created and are used extensively to share scheme related updates, beneficiary testimonials and important milestones. NHA is also providing guidance and support to State/UT level IEC teams to organise state level events and to promote PM-JAY at empanelled hospital level. Considering the need for an effective communication strategy for all stakeholders at State/UT level, NHA had organised ‘IEC training programme for SHAs’ where the ‘IEC guidebook’ explaining the brand guidelines for PM-JAY and NHA was distributed.

Since the launch, NHA has created layouts for Prime Minister's letter to the beneficiaries, customized backdrops, posters, banners, leaflets, standees, booklets, brochures, hoardings, newspaper advertisements (masthead, quarter page, half page, full page, advertorial), PM-JAY e cards, magazine advertisements etc. NHA has also developed creatives for empanelled hospitals like Empanelment certificates, hoardings, signages, posters, Pradhan Mantri Arogya Mitra kiosk & dress etc. The IEC team has developed and re-designed the Ayushman Bharat PM-JAY website (www.pmjay.gov.in) to act as a gateway to answers to all queries related to PM-JAY. The website is well-equipped with relevant information and links to list of empanelled hospitals, the “Am I Eligible” portal, grievance redressal portal, PM-JAY photo and video gallery etc.

In order to reach primary and secondary audience, NHA has been making its mark in global events like Partner's Forum, Vibrant Gujarat Summit and CII's Health Tech Summit and spreading awareness about the scheme to regional, national and global audiences. To ensure wide coverage about PM-JAY, world's largest healthcare scheme, NHA regularly shares scheme updates and facilitates media interaction with the CEO and Dy. CEO. Ayushman Bharat is regularly covered in leading national and regional electronic and print media. The IEC team at NHA will continue to strive towards achieving the goal of reaching out to the last mile beneficiary!

#PMJAYmakingAdifference

JHARKHAND

Vimla Devi, wife of a small farmer of Gumla, was diag. with uterus cancer. Local doctors advised treatment in a speciality hospital but they couldn't afford it. But with #PMJAY they came to Curie hospital #Ranchi where she got free Radiotherapy. Vimla is responding well to it.

PM-JAY a gamechanger for Health sector

PM-JAY ensures Health for All

JHARKHAND

Ramgarh, #Jharkhand based, 9 year-old Kuhu got leg burns in a fire accident 2 years back. Due to monetary constraint, she couldn't get treatment. Under #PMJAY she got free Post Burn Contracture surgeries for Functional Improvement and is now healing at Dev Kamal hospital #Ranchi.

UTTAR PRADESH

72 year old Shiv Kumari had suffered a serious fall and was taken to a local hakim for treatment by her farmer husband. Since her condition did not improve, the family took her to a hospital, where a bipolar hemiarthroplasty was prescribed by the doctors. Since she was a PM-JAY beneficiary, the family did not have to worry about the treatment cost. Shiv Kumari underwent a successful surgery and is now recovering.

PM-JAY for a healthier tomorrow

PM-JAY a boon for the poor

BIHAR

14 year old Ritu from Rehsapur had always wanted to be a teacher, but it seemed like a distant dream. She had a disability - an extra flap of skin on her arms at the elbows - which made it impossible for her to hold anything straight. Father despite being aware of reconstructive surgery treatment, could not afford it. However, through PM-JAY, he was able to get her treated and give her the confidence to fulfill her dream.

#PMJAYmakingAdifference

JAMMU & KASHMIR

48 year old Ramesh Lal was taking painkillers to pacify the pain in his chest. He was trying to avoid the high hospital costs needed to remove the blood clot clogging his vessels. It was only after he saw his name as a beneficiary under PM-JAY that he got himself treated, PTCA single stent. Lal is not sick anymore and is not taking any painkillers.

PM-JAY rekindling hope

PM-JAY a blessing

JHARKHAND

9 yr-old Shikha of Ranchi was suffering from Asthma, Chronic respiratory problems for 3-4 years. Her father is garage mechanic; couldn't afford treatment. She suffered an asthma attack & was brought to Rani hospital. With #PMJAY she got free treatment for ~90 days worth >Rs.4L.

HARYANA

Over six years ago, the doctors had prescribed a valve replacement in 22 year old Dimple's heart. Her farmer father had resigned to the destiny since he couldn't afford the expensive surgery. But as soon as he found out about PM-JAY, he got her admitted in the hospital to undergo the delayed surgery. Dimple is now recovering and living a healthy life!

PM-JAY saving lives

PM-JAY comes as a saviour

MAHARASHTRA

49 year old Ravindra Bhave, was rushed to hospital when he complained of severe chest pain. The doctors prescribed angioplasty, since the family could not afford it, they returned home only to rush back again when Ravindra got a second heart attack, within ten days of the first episode. This time the family was informed that they are PM-JAY beneficiaries. Ravindra underwent Coronary Balloon Angioplasty, costing 2 lakh completely free.
